

Quad Cities Manufacturing Innovation Hub

Here to help your business grow,
diversify, and stay competitive

Operational Excellence

Bridging the River. Building the Region.

Manufacturing technology is changing. From additive manufacturing to the Internet of Things, digital supply chain readiness and everything in between, keeping up with these advances is a difficult job. The Quad Cities Manufacturing Innovation Hub is here to help.

The Quad Cities Manufacturing Innovation Hub can be your partner in evaluating new technologies, identifying ways to optimize your operations, and connecting you to valuable resources.

Services Include:

- One-on-one assessments to identify areas of improvement within your manufacturing processes, along with potential costs and implementation assistance.
- Educational seminars to help you stay up to speed on new technologies.
- Peer to peer connections enabling you to share best practices among colleagues and source more procurement locally.

About the Quad Cities Manufacturing Innovation Hub:

- An initiative of the Quad Cities Chamber helping regional manufacturers grow through innovation and collaboration
- Partnered with CIRAS and IMEC, Iowa and Illinois' Manufacturing Extension Partnerships, to help small and medium sized manufactures improve their current performance
- A Satellite organization of the Digital Manufacturing and Design Innovation Institute, to improve the way our manufacturers share data and implement emerging technologies
- Teamed with the University of Illinois, which was awarded a \$5.5 million grant from the U.S. Department of Defense (DoD) Office of Economic Adjustment, to help diversify the skills and customer base of DoD manufacturers that have been impacted by changes in federal defense spending
