

# Quad Cities Manufacturing Innovation Hub

Here to help your business grow,  
diversify, and stay competitive

---

## Technology Excellence

---

Bridging the River. Building the Region.

# Is your company digital ready? Do you know how new technologies will impact your business? The Quad Cities Manufacturing Innovation Hub is here to help.

## Develop a Technology Road Map

The Quad Cities Manufacturing Innovation Hub has teamed up with a nationally-known growth and innovation firm that specializes in helping organizations deal with emerging technologies.

The Quad Cities Manufacturing Innovation Hub can:

- Help you understand the technologies most likely to impact your business
- Provide a guide for your training and investments
- Identify common problems that we can solve regionally, leveraging our resources to find cost effective solutions.

## Get Ready for the Digital Supply Chain

Exchanging data with suppliers and customers is becoming a strategic competitive advantage. The Quad Cities Manufacturing Innovation Hub will help you improve the use of data in your factory operations, and communications with your supply chain.

## About the Quad Cities Manufacturing Innovation Hub:

- An initiative of the Quad Cities Chamber helping regional manufacturers grow through innovation and collaboration
- Partnered with CIRAS and IMEC, Iowa and Illinois' Manufacturing Extension Partnerships, to help small and medium sized manufactures improve their current performance
- A Satellite organization of the Digital Manufacturing and Design Innovation Institute, to improve the way our manufacturers share data and implement emerging technologies
- Teamed with the University of Illinois, which was awarded a \$5.5 million grant from the U.S. Department of Defense (DoD) Office of Economic Adjustment, to help diversify the skills and customer base of DoD manufacturers that have been impacted by changes in federal defense spending
